

# Jacob Coble

## Projects

### Listable

Listable is a classified ads website written in Ruby on Rails. User authentication is handled by the Devise gem. Pictures are uploaded with Paperclip and stored on Amazon's S3 service. The ad listings and search-as-you-type feature were implemented with Backbone.js.

### Asteroids

Asteroids is an implementation of the classic "Asteroids" game in JavaScript using HTML5 canvas.

### Checkers

Checkers is an implementation of the checkers boardgame written in Ruby. It uses TCP sockets for LAN multiplayer support.

## Experience

### QA, Pfizer, staffed through Insight Global, Oct. 2013 – Mar. 2014

- Automated an inefficient part of the receiving process and saved the inventory lead hours of time.
- Assisted the understaffed helpdesk team by moving and closing helpdesk tickets.
- Wrote an Autolt script to speed up the QA process.
- Volunteered to work a late shift to set up overnight builds.

## Education

### App Academy, NYC, May 2014 — July 2014

Ruby on Rails and JavaScript programming school with a 5% applicant acceptance rate.

### Salt Lake City, UT, Western Governors University, Sept. 2009 – Feb. 2012

B.S. in Information Technology with a Software focus. Four year degree completed in three.
